

Homework #2
Computation Theory
Due Date: 29/11/2025 (Late submissions lose 50%)

Given the alphabet $\Sigma = \{a, b, c\}$ and languages $L_1 = \{abb, bc\}$ and $L_2 = \{w \in \Sigma^* : w \text{ has an even number of } c\text{'s and exactly three } b\text{'s}\}$ defined over Σ , find each of the following:

- i) $L_1 L_2$
- ii) $L_2 L_1$

Important Notes:

- You must include all of the following information in your submitted homework:
 Name: -----
 Student Number: -----
 Course: *Computation Theory*
 Section: -----
 Homework #: 2
- Homework *must* be submitted *online on the eLearning site*. If you have a problem, you can submit an initial electronic copy before the due date to my email: ayman@zuj.edu.jo and submit the eLearning copy later.
